ADAPTIVE TRAFFIC AI

AI IN URBAN TECH

GREEN MEANS SMART.

AI traffic signals that **see**, **think**, and **adapt**.

01

SEE

Cameras count every vehicle on every approach, in real time.

02

THINK

A deep Q-network weighs the traffic and decides every second.

03

ADAPT

Green follows real demand, not a fixed clock. Queues stay short.

2/3	7.3s	47%	5,506
BENCHMARK SCENARIOS WON	BEST AVERAGE DELAY	LESS DELAY UP TO	PARAMETERS TRAINED DQN
